

Yes, you can very well do something for the children!

“Constant dripping wears away the stone!”

Anyone can help and any help counts, even the most insignificant help.

If you enjoy writing, you can write letters to one or all of the following departments. Sometimes one can already make his opinion clear in three sentences. If you don't dare then please don't think, “I cannot change anything anyway!” Please don't be silent; talk to your neighbors or friends about it and give them this paper!

So if you want to write your opinion in favor of our children, you can find below the addresses of the newspapers and responsible people on federal level (only examples). All our appeals on federal state level seemingly fell on deaf ears.

You can write something in favor of individual families you personally know and/or in favor of the whole community.

We would be happy if you could send a copy of your letter to this address:

mail_us@twelvetribes.de and if you agree (please let us know clearly) we will publish it on our websites, because many times letters to the editor that were written in our favor have simply not been published. Please let us know if you want us to publish your initials only.

Once again we would like to thank you all for your support!
